

- ① Create a node.
- ② assign the value
- ③ attach.

a) If (head == NULL)

head = newnode;

head → next = newnode;

};

- 1) Traverse till the last node.
Struct node *trav = head;

While(trav->next != head)
Trav = trav->next;

- 2) Attach the new node to the last node.
Trav->next = new_node;

- 3) Attach the new last node to the first node to make it circular.
New_node->next = head;
