

```

a) if (head->next == head)
{
    free(head);
    head = NULL;
}

```

$300 \neq 100 \checkmark$
 $400 \neq 100 \checkmark$
 $100 \neq 100 \times$

Traverse till the second last node.

```

while (trav->next->next != head)
{
    trav = trav->next;
}

```

Free the last node using the trav.
`Free(trav->next);`

To make it circular.
`Trav->next = head;`
