

# DLL - add node at last.

24 April 2024 12:56

- ① create a node.
- ② assign a value.
- ③ attach the node to the list.

a) If (head == NULL)  
 {  
 head = newnode;  
 tail = newnode;  
 }.

500 → prev = 300;  
 ① newnode → prev = tail;  
 300 → next = 500;  
 ② tail → next = newnode;  
 tail = 500;  
 ③ tail = newnode;

O(1)

Struct node

```
{
    Struct node *prev;
    Int data;
    Struct node *next;
}
```

```
Strcut node *head = NULL;
Struct node *tail = NULL;
```
